

Introduction

This document offers a comprehensive overview of the sustainability features and performance of this specific fund, focusing on its alignment with binding sustainability commitments.

It provides clear and factual information on key sustainability aspects, including the fund's performance in areas such as sustainable inclusion, active ownership and exclusion practices. The data included in this report is based on already reported data from the fund's most recently available SFDR annual report.

By presenting the fund's sustainability profile, the document reflects Danske Bank's commitment to transparency and responsible investing, supporting investors in making informed decisions that align with their financial goals and sustainability preferences.

Sustainability features

Danske Invest SICAV European Corporate Green Bond

What are sustainability features?

This fund is guided by binding sustainability commitments, which are defined in its investment strategy and legal documentation. These commitments ensure that specific sustainability principles and criteria are consistently applied throughout the investment process. They may include obligations to include defined sustainability features, exclude certain types of investments, and engage in active ownership activities such as engagement and voting. By adhering to these binding commitments, the fund ensures accountability and transparency in its approach to sustainability.

Sustainable investments

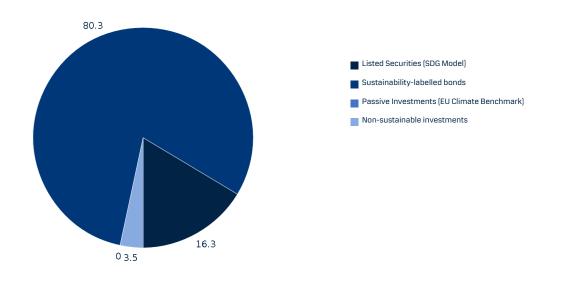

Danske Invest SICAV European Corporate Green Bond

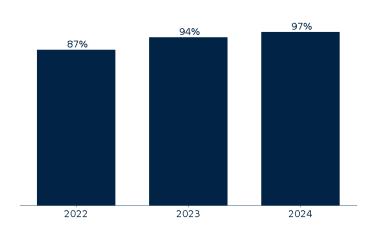

What is a sustainable investment?

A sustainable investment is an investment in an economic activity that contributes to an environmental or social objective, provided it does not significantly harm other environmental or social objectives and that the investee companies follow good governance practices. Exposure to sustainable investments can be achieved through various asset classes and investment approaches.

Sustainable investments development

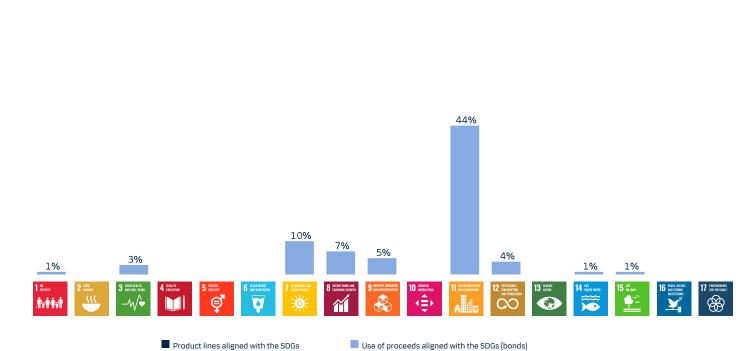

Sustainable investments - Sustainable Development Goal (SDG) contribution

Danske Invest SICAV European Corporate Green Bond

What is a sustainable investment with SDG contribution?

An investment can be deemed a sustainable investment through having material "SDG contribution". Danske Bank's model evaluates companies based on revenue derived from SDG-aligned product lines or, in the case of bonds, the allocation of proceeds to projects or activities that support SDG objectives. Investments are classified as sustainable if they meet specific thresholds and criteria.

Portfolio SDG contribution

Examples of products and services, as well as use of proceeds from bonds, that we have classified as having a positive contribution to one or more of the SDGs.

Air filtration equipment Job websites

Allergies management Metal recycling

Asthma therapeutics Photovoltaic and solar cells

Electric vehicles

Electrical infrastructure

Flectronic waste services

Garbage collection services

Danske Bank The figures are based on the 2024 SFDR report.

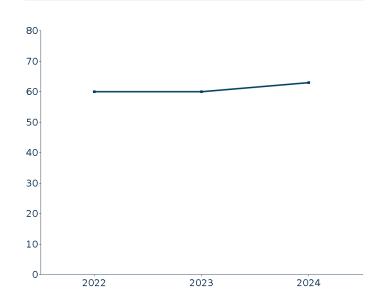

Inclusion - sound sustainability practices

Danske Invest SICAV European Corporate Green Bond

What is inclusion of sound sustainability practices?

The inclusion of "sound sustainability practices" is measured through the weighted ESG score of the portfolio, based on an internally developed scoring model. It aims to reduce exposure to companies with prominent sustainability risk. The product's weighted average mScore must exceed 50.

mScore scale 66-100 Leader 56-65 Outperformer 40-55 Medium performer 0-39 Laggard

Portfolio development

mScore

By combining insights from multiple third-party ESG research providers, the mScore delivers a balanced sustainability risk assessment. The mScore focuses on two key components:

- Financial materiality: It identifies ESG factors that are most significant to financial outcomes.
- · Sector specific: Leveraging reliable research from SASB, the mScore uses tailored sector data.

Danske Bank

Inclusion - sound environmental stewardship

Danske Invest SICAV European Corporate Green Bond

What is sound environmental stewardship?

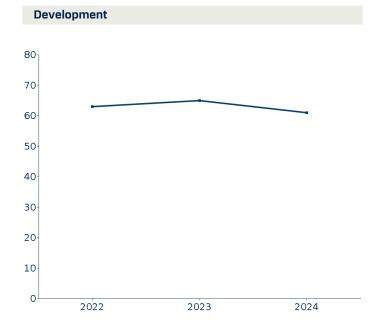

The product promotes sound environmental stewardship by encouraging responsible management of environmental risks. The inclusion of "sound environmental stewardship" is measured through the carbon risk rating score of the portfolio, based on a rating score sourced from ISS ESG. The product's weighted average carbon risk rating must exceed 50.

Carbon Risk Rating scale 75-100 Leader 50-74 Outperformer 25-49 Medium Performer 0-24 Laggard Portfolio Carbon Risk Rating score Outperformer Outperformer

Carbon Risk Rating

The Carbon Risk Rating is a forward-looking assessment that helps determine how effectively the portfolio's investments manage carbon-related risks to remain sustainable and competitive. It is based on two key parts:

- · Carbon risk classification: Measures a company's climate risks based on its industry and business activities.
- Carbon performance score: Evaluates a company's current carbon performance, its ability to manage future climate risks, and its readiness to take advantage of climate-related opportunities.

Danske Bank

Exclusions

Danske Invest SICAV European Corporate Green Bond

What are exclusions?

Excluded

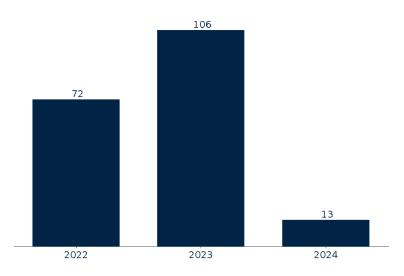

Not excluded

The product applies exclusions on certain criteria. Exclusions are applied to minimize risks and reduce negative impacts linked to specific investments.

EU Taxonomy

Danske Invest SICAV European Corporate Green Bond

What is the EU Taxonomy?

The EU taxonomy is a classification system that defines which economic activities are environmentally sustainable. It supports investments in activities that align with the EU's goal of net zero emissions by 2050 and other environmental goals.

 $\textbf{Revenue:} \ \text{The profit a company makes after subtracting expenses from its revenue.}$

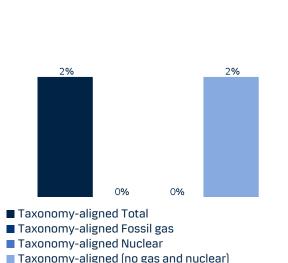

Capital Expenditures (CapEx): Long-term investments in assets like buildings, machinery or technology.

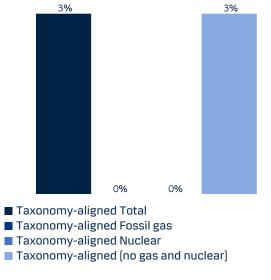

Operational Expenditures (OpEx): Daily costs to run the business, like raw materials, utilities or maintenance and repairs.
