

# Danske Invest SICAV China Class WI-eur

## Carbon footprint measurement

Carbon footprint on funds is computed by measuring companies' Scope 1 (direct emissions from own facilities) and Scope 2 (emissions from purchased energy). CO2 data is retrieved from data-service provider Trucost that uses companies' disclosed data for Greenhouse Gas (GHG) emissions in accordance with the GHG Protocol (Greenhouse Gas Protocol Corporate Standard). For more details see Danske Bank carbon footprint on funds methodology.

### Country domicile contribution (% of apportioned tCO2e)

### Top-5 sector contribution (% of apportioned tCO2e)

### Top-5 holding contribution (% of apportioned tCO2e)

China Resources Cement Holdings Ltd	50%
China Everbright International Ltd	18%
Pacific Basin Shipping Ltd.	5%
Tiangong International Co Ltd	4%
Yum China Holdings Inc	4%

### Relative carbon footprint (tCO2e/mUSD invested)

The metric is a normalized measure of the portfolio's CO2e contributions based on the total value of the investments. This allows for comparison across portfolios.

### Carbon intensity (tCO2e/mUSD revenue)

The metric is generated by the company's direct and indirect operations. Hence, using revenue to normalize the CO2e can show the carbon efficiency of the portfolio and the level of associated carbon risk.

### Weighted avg. carbon intensity (tCO2e/mUSD revenue)

The metric estimates the portfolio exposure to carbon intensive companies. Unlike previous metrics, CO2e intensities are allocated on portfolio weights rather than an on ownership or responsibility basis.

**Portfolio coverage (%)**  
Part of AuM with emission data

98.8

**CO2 emissions**  
Apportioned tCO2e for holdings

3,705.3

## Basic information

ISIN code	LU1678977114
Benchmark	MSCI China Index (net dividends reinvested)
Website	<a href="https://www.danskeinvest.com">https://www.danskeinvest.com</a>
Fund domicile	LU
Currency	EUR
Manager	Christina Chung

## Investment policy

The fund invests mainly in Chinese equities. Specifically, the fund invests at least two-thirds of net assets in equities and equity-related securities that are traded on a regulated market and are issued by companies that are domiciled, or do most of their business, in the People's Republic of China (PRC), Hong Kong or Macao. In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment characteristics. The fund generally expects that its holdings, and therefore its performance, may not differ significantly from those of the benchmark. The fund may use derivatives for hedging and efficient portfolio management. The fund may invest in Chinese A-shares subject to quota and operational constraints, which may increase legal and counterparty risk.
