

Danske Invest SICAV Russia Class A

ESG investment restrictions explained

A fund with ESG restrictions is not allowed to invest in companies that are involved in certain business activities. For instance, none of Danske Invest's funds may invest in companies deriving 30% or more of their revenue from coal. The restriction criteria for this specific fund is outlined in the section below.

Important information:

- Danske Invest continuously updates its ESG data, this can lead to new companies becoming restricted as well as restricted companies being opened for investments.
- Funds may not be exposed to any restricted companies in their investment universe and thus be unaffected by the ESG restrictions.
- For Fund-of-funds, restrictions may not apply to externally managed funds (not managed by Danske Invest).

Benchmark	MSCI Russia 10/40 Net Total Return Index in USD (net dividends reinvested)
Website	https://www.danskeinvest.com
Fund domicile	LU
Currency	USD
Manager	Olga Karakozova

Investment policy

The fund invests mainly in Russian equities. Specifically, the fund invests at least two-thirds of net assets in equities and equity-related securities that are traded on a regulated market in Russia or in a state of the former Soviet Union (including Estonia, Kazakhstan, Latvia, Lithuania and Ukraine), or, if traded on a regulated market elsewhere, are issued by companies that are domiciled, or do most of their business, there. In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment characteristics. The fund generally expects that its holdings, and therefore its performance, may not differ significantly from those of the benchmark. The fund may use derivatives for hedging and efficient portfolio management.
