

Danske Invest SICAV Emerging Markets Debt Hard Currency Class WA-eur h

ESG investment restrictions explained

A fund with ESG restrictions is not allowed to invest in companies that are involved in certain business activities. For instance, none of Danske Invest's funds may invest in companies deriving 30% or more of their revenue from coal. The restriction criteria for this specific fund is outlined in the section below.

Important information:

- Danske Invest continuously updates its ESG data, this can lead to new companies becoming restricted as well as restricted companies being opened for investments.
- Funds may not be exposed to any restricted companies in their investment universe and thus be unaffected by the ESG restrictions.
- For Fund-of-funds, restrictions may not apply to externally managed funds (not managed by Danske Invest).

Investment restrictions & definitions

The following investment restrictions are applied for the fund:

- | | | |
|---|---|--|
| <input type="checkbox"/> Alcohol

Website	https://www.danskeinvest.com
Fund domicile	LU
Currency	EUR
Manager	Bent Lystbæk & Jacob Ellinge Nielsen

Investment policy

The fund invests mainly in corporate and government bonds from emerging markets. To a small extent, the fund may invest in bonds issued in the European Union or the USA. The fund systematically integrates ESG factors alongside financial factors, treated holistically and managed from a risk-return perspective in the investment process. Material ESG issues are addressed and promoted through active ownership. The fund may invest in, or be exposed to, the following investments up to the percentage of net assets indicated: Bonds with a rating of Caa/CCC (or similar) or lower or unrated bonds: 15%. Debt instruments that are unrated or are considered to be in default because they have failed to make one or more required payments on schedule: 10%. In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment characteristics. The fund generally expects that its holdings, and therefore its performance, may differ significantly from those of the benchmark. The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes. The total duration, including cash, is the benchmark duration plus or minus 2 years. The main part of the share class' NAV will be hedged against the base currency of the fund. However, the share class remains exposed to the currencies of the investments in the fund.
