

# Danske Invest SICAV Europe High Dividend Class WA-sek

## ESG data

Danske Bank leverages ESG research & analytics from multiple data vendors. In this report, we use Sustainalytics 'ESG Risk Rating' framework which measures the degree to which a company's economic value is at risk driven by ESG factors, or rather, the magnitude of a company's unmanaged ESG risks.

## Sustainalytics research out-takes

- Measures company exposure to industry-specific material risks and how well the company is managing those risks.
- The level of exposure is based on factors such as the business model, financial strength, geography and controversies.
- Corporate governance ratings are fully integrated into the ESG risk ratings as the baseline for all companies.
- Nearly 40 industry-specific indicators available to assess company performance.

## Sustainalytics building blocks

## Sustainalytics risk levels

Holdings	Scale
Severe	>40
High	30-40
Medium	20-30
Low	10-20

Benchmark	MSCI Europe Index (net dividends reinvested)
Website	<a href="https://www.danskeinvest.com">https://www.danskeinvest.com</a>
Fund domicile	LU
Currency	SEK
Manager	Peter Nielsen

## Investment policy

The fund invests mainly in European equities issued by companies whose products or services are well established and that are expected to generate high levels of dividends. To a small extent, the fund may invest in equities from Eastern Europe and countries bordering Europe. The fund may invest in countries considered as emerging markets. Countries bordering Eastern Europe include, but are not limited to, Armenia, Azerbaijan, Georgia, Kazakhstan and Turkey. In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment characteristics. The fund generally expects that its holdings, and therefore its performance, may differ significantly from those of the benchmark. The fund may use derivatives for hedging and efficient portfolio management.
