Investment policy

The fund invests mainly in index bonds primarily issued by OECD-countries or guaranteed by one or more OECD-countries. The bonds are listed or traded on an official stock exchange or another recognized market place.

The fund invests mainly in investment grade bonds. The currency risk is limited since the fund aims to hedge currency risks of non-euro denominated investments.

In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment characteristics.

The fund may use derivatives for hedging and efficient portfolio management. The main part of the share class' NAV will be hedged against the base currency of the fund. However, the share class remains exposed to the currencies of the investments in the fund.
