

Objectives and investment policy**Objectives**

The objective of this alternative investment fund is to generate long term returns by investing in alternative investment assets.

Investment policy

The fund invests directly or indirectly in a diversified portfolio of alternative investment assets such as infrastructure, alternative credit investments, private equity, forest and farmland and real estate ("target assets"). Investments will mainly be private type investments located within OECD countries. Investments aim at sectors with fixed income streams. Until the fund is fully invested in target assets, it will invest in a portfolio of liquid assets which will be sold when target assets are available. The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes. Usually the expected level of leverage is 265%.

The fund adheres to the Responsible Investment policy of Danske Bank and restricts certain sectors, companies, products, or activities from its investment universe.

Fund shares can normally be redeemed on redemption days. However, limits on redemption may be in effect. Please refer to the following section in the fund's prospectus: "Redemption of Shares".

Recommendation: The fund may not be appropriate for investors who plan to redeem their money within 7 years.

This fund is restricted to investors who qualify as "Well-Informed Investors" as defined in the the prospectus.
