

Objectives and investment policy**Objectives**

The objective of this alternative investment fund is to generate long term returns by investing in alternative investment assets.

Investment policy

The fund invests directly or indirectly in a diversified portfolio of alternative investment assets such as private equity, infrastructure, alternative credit investments and other real assets ("target assets"). Investments will mainly be private type investments located within OECD countries. The returns of the portfolio investments are expected to derive mainly from capital gains and to a lesser extent from dividends and interest. Until the fund is fully invested in target assets, it will invest in a portfolio of liquid assets which will be sold when target assets are available. The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes. Expected leverage is 275%. The fund adheres to the Responsible Investment policy of Danske Bank and restricts certain sectors, companies, products, or activities from its investment universe.

Fund shares can normally be redeemed on redemption days. However, limits on redemption may be in effect. Please refer to the following section in the fund's prospectus: "Redemption of Shares".

Recommendation: The fund may not be appropriate for investors who plan to redeem their money within 7 years. This fund is restricted to investors who qualify as "Well-Informed Investors" as defined in the the prospectus.

Manager**Name:**

Jens Denkov
Danske Bank Asset Management

Title:

Chief Investment Director

Background:

M.sc. (Economics)

Years of experience:

12
