

Objectives and investment policy**Objectives**

The objective of this fund is to achieve above-market performance. The share class is accumulating.

Investment policy

The fund invests mainly in Nordic corporate bonds. Specifically, the fund invests at least two-thirds of net assets in corporate bonds and other debt instruments that are traded on a regulated market and are issued by companies that are domiciled, or do most of their business, in Nordic countries. The fund's weighted average credit rating is Baa3/ BBB- or higher.

At least 90% of the fund's investments must be denominated in or hedged to EUR.

The total modified duration of the fund, including cash, is from 0 to the benchmark duration plus 2 years. The duration indicates among others the price risk of the bonds in which the fund invests. The lower the duration, the more price stable the bonds, if interest rates change.

In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment characteristics. The fund generally expects that its holdings, and therefore its performance, may differ significantly from those of the benchmark.

The fund may use derivatives for hedging and efficient portfolio management, as well as investment purposes.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Return in the period: 15.11.2017 - 30.11.2020

The default for the chart is the return for the past 5 years as of end of month or, if the fund is less than 5 years old, since launch. Past performance is not a reliable indicator of future results.
