

Objectives and investment policy

Objectives

The objective of this fund is to achieve above-market performance. The share class is accumulating.

Investment policy

The fund invests mainly in inflation-linked bonds with a short duration. Specifically, the fund invests at least two-thirds of net assets in bonds and other debt instruments that are traded on a regulated market, are issued or guaranteed by an OECD country or a (supranational) agency, and whose returns are linked to inflation indices in the OECD countries. These securities are rated Baa3/BBB- or higher (or similar).

At least 90% of the fund's investments are denominated in, or hedged into, EUR. The total duration of the fund, incl. cash holding is the benchmark duration plus/minus 2 years. The duration indicates among others the price risk of the bonds in which the fund invests. The lower the duration, the more price stable the bonds, if interest rates change.

In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment characteristics. The fund generally expects that its holdings, and therefore its performance, may differ somewhat from those of the benchmark.

The fund may use derivatives for hedging and efficient portfolio management. Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Return in the period: 15.11.2017 - 31.01.2020

The default for the chart is the return for the past 5 years as of end of month or, if the fund is less than 5 years old, since launch. Past performance is not a reliable indicator of future results.
