

Objectives and investment policy

Objectives

The objective of this fund is to achieve above-market performance. The share class is accumulating.

Investment policy

The fund invests mainly in Swedish bonds and money market instruments. Specifically, the fund invests at least two-thirds of net assets in bonds and other debt instruments that are traded on a regulated market and are denominated in SEK. These securities are issued or guaranteed by the Swedish government, municipalities or public organisations. The fund may also invest in mortgage-credit bonds issued by a credit institution subject to public supervision in a EU member state.

In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment characteristics. The fund generally expects that its holdings, and therefore its performance, may differ somewhat from those of the benchmark.

The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes.

The total average modified duration, including cash, is 1 to 5 years. The duration indicates among others the price risk of the bonds in which the fund invests. The lower the duration, the more price stable the bonds, if interest rates change.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Return in the period: 22.11.2017 - 31.01.2020

The default for the chart is the return for the past 5 years as of end of month or, if the fund is less than 5 years old, since launch. Past performance is not a reliable indicator of future results.
