

Objectives and investment policy

Objectives

The objective of this fund is to achieve investment growth in any type of market conditions (absolute return). The share class is accumulating.

Investment policy

The fund invests mainly in a focused selection of long and short positions in Eastern European and Turkish equities. To a small extent, the fund may also invest in equities from countries bordering Eastern Europe. Some Eastern European and non-European securities may be from emerging markets. In actively managing the fund's portfolio, the management team uses a long-short strategy, taking long exposure to equities it believes will increase in price and short exposure to equities it believes will decline in price or offset the volatility of its long positions. The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes. The main part of the share class' NAV will be hedged against the base currency of the fund. However, the share class remains exposed to the currencies of the investments in the fund. Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.
