

Objectives and investment policy

Objectives

The objective of this fund is to achieve above-market performance. Dividends are normally distributed to investors each year.

Investment policy

The fund invests mainly in European corporate bonds that have a strong sustainability profile as defined by Environment, Social and Governance (ESG) criteria, including climate change and greenhouse gas emissions. Specifically, the fund invests at least two-thirds of net assets in corporate bonds that are traded on a regulated market and are issued in OECD countries by companies that comply with international principles for responsible investments and are not active in controversial sectors such as arms and cluster munitions manufacturing, alcohol and pornography. At least 75% of the sub-fund's assets invested in bonds must have a quality corresponding to a credit rating of Baa3/BBB- or higher. At least 90% of the fund assets should be invested in bonds denominated in or hedged to EUR. In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment characteristics. The fund generally expects that its holdings, and therefore its performance, may differ significantly from those of the benchmark. The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes. The total modified duration of the fund, including cash, is from 0 to the benchmark duration plus 2 years. The duration indicates among others the price risk of the bonds in which the fund invests. The lower the duration, the more price stable the bonds, if interest rates change. Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Return in the period: 14.11.2017 - 31.01.2020

The default for the chart is the return for the past 5 years as of end of month or, if the fund is less than 5 years old, since launch. Past performance is not a reliable indicator of future results.
