Objectives

The objective of this fund is to achieve above-market performance. The share class is accumulating.

Investment policy

The fund invests mainly in Swedish equities, bonds and money market instruments.

Specifically, the fund invests at least two-thirds of net assets in equities and equity-related securities, as well as corporate or government bonds and other debt instruments, that are traded on a regulated market in Sweden, or, if traded on a regulated market elsewhere, are issued by companies that are domiciled, or do most of their business, in Sweden.

In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment characteristics. The fund generally expects that its holdings, and therefore its performance, may differ significantly from those of the benchmark.

The fund may use derivatives for hedging and efficient portfolio management, as well as investment purposes.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.
