

Objectives and investment policy

Objectives

The objective of this fund is to achieve investment growth in any type of market conditions (absolute return). The fund is accumulating.

Investment policy

The fund seeks exposure to volatility risk premia embedded in equities, fixed income, credit, currencies and money market instruments from anywhere in the world with a focus on developed markets. The volatility-based strategies are implemented using derivatives such as options, futures and swaps. The fund may also, for a short period of time, invest directly, or via UCITS or UCIs, into such underlying securities. The fund will invest its remaining assets in UCITS (including UCITS ETFs), UCIs, high credit quality debt instruments, such as bonds issued by governments and credit institutions, money market instruments and/or short-term deposits.

The fund also uses derivatives with the aim of generating additional capital or income. As a result of the use of derivatives, the fund can be leveraged by using derivatives. Usually the expected level of leverage: 800% to 1,000%; maximum expected leverage: 4,000%. This means that the exposure to underlying assets may be much larger than 100%. Leverage may increase the effects of adverse market movements or decrease the effects of favourable market movements.

Recommendation: This fund is restricted to well-informed investors. This alternative investment fund may not be appropriate for investors who plan to withdraw their money within 3 years.
