Investment policy

The fund gains most of its exposure to investment grade bonds from anywhere in the world, including emerging markets, by investing directly in securities or indirectly, through derivatives and other funds. The fund may also invest in equities.

The fund adheres to the Responsible Investment Policy of Danske Bank and restricts certain sectors and companies from its investment universe.

In actively managing the fund's portfolio, the management team applies a flexible and dynamic asset allocation (including both strategic and tactical asset allocation) that seeks to take full advantage of market changes and opportunities, and to protect the fund against inflation.

The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.
