

Objectives and investment policy

Objectives

The objective of this fund is to achieve long-term investment growth, while applying a defensive-to-balanced asset allocation strategy. The share class is accumulating.

Investment policy

The fund is a feeder fund, and invests at least 85% of its net assets in class X shares of a master fund, Danske Invest SICAV Global Portfolio Solution - Defensive.
 The fund may use derivatives only for hedging, such as to hedge some or all of its holdings in the master fund, and the master fund's investments, into EUR.
 The master fund gains exposure, directly or through other funds, to a range of asset classes from anywhere in the world, such as equities, bonds and money market instruments. The net exposure to equities usually range from 0% to 30% of the master fund's net assets but may be higher depending on the investment manager's market outlook. The master fund may gain exposure to any credit quality, sector and country, including emerging markets.
 In actively managing the master fund's portfolio, the management team applies a flexible and dynamic asset allocation that seeks to take full advantage of market changes and opportunities.
 The master fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes.
 Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Return in the period: 29.10.2019 - 31.01.2020

The default for the chart is the return for the past 5 years as of end of month or, if the fund is less than 5 years old, since launch. Past performance is not a reliable indicator of future results.
