

Objectives and investment policy

Objectives

The objective of this fund is to achieve above-market performance. The share class is accumulating.

Investment policy

The fund invests mainly in corporate bonds from issuers in the OECD that have a strong sustainability profile or an improving sustainability profile as defined by Environment, Social and Governance (ESG) criteria, including climate change and greenhouse gas emissions. Specifically, the fund invests at least two-thirds of net assets in corporate bonds that are traded on a regulated market and are issued in OECD countries by companies or credit institutions that comply with international principles for responsible investments and are not active in sectors such as controversial weapons, alcohol and pornography. The total modified duration, including cash, is from 0 to the benchmark duration plus 2 years. The duration indicates among others the price risk of bonds in which the funds invests. The lower the duration, the more price stable the bonds, if interest rates change. At least 90% of the fund's investments are denominated in, or hedged into, EUR. In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment characteristics. The fund generally expects that its holdings, and therefore its performance, may differ significantly from those of the benchmark. The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes. Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Return in the period: 08.10.2019 - 31.01.2020

The default for the chart is the return for the past 5 years as of end of month or, if the fund is less than 5 years old, since launch. Past performance is not a reliable indicator of future results.
