Objectives and investment policy

Objectives

The objective of the fund is to generate absolute returns. The share class is accumulating.

Investment policy

The fund mainly invests in long and short positions in bonds and other debt instruments listed or traded on a recognized market and are issued by credit institutions and governments in OECD countries.

The fund utilises to a large extent financial derivative instruments and leverage for risk taking or hedging purposes.

The gross exposure is capped at 150 times the value of net assets.

The investment strategy is active. This means that there may be significant differences in the return relative to the alternative investment fund's target.

The fund is categorized under SFDR as article 8 and promotes

environmental and/or social characteristics, as well as good governance practices, through screening, restrictions, investment analysis and decision-making as well as active ownership. The fund follows Danske Invest PCC Limited's responsible investment policy.

Subscription is only possible for investors with a portfolio management agreement with Danske Bank or other distributor as described in the Supplemental Scheme Particulars.

Fund shares can normally be redeemed on banking days.

Recommendation: This alternative investment fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Benchmark

The benchmark used as hurdle rate for performance fee calculation is the Euro short-term rate. The alternative investment fund is managed without any constraint related to the benchmark.

Risk and reward profile

The alternative investment fund is categorized as 5. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the alternative investment fund's net asset value over the past five years, representative data or the maximum risk class.

Significant historical volatility equals high risk and low volatility equals lower risk. Please note that the alternative investment fund's categorization is not constant and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile. The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are interest rate risk, credit risk, leverage risk, derivative risk and exchange rate risk. Changes in interest rates will affect the fixed income investments.

For further details about risk, please refer to the following section in the fund's prospectus: "Risk Factors".
