Danske Invest SICAV

Nordic Corporate Bond Class A (LU1116404325)

This fund is managed by Danske Invest Management Company, part of the Danske Bank group.

Objectives and investment policy

Objectives

The objective of this fund is to achieve above-market performance. The share class is accumulating.

Investment policy

The fund invests mainly in corporate debt instruments listed or traded on a regulated market and issued by companies domiciled in or with main activity in any Nordic country. Up to 25% of its assets may be invested in covered bonds from Nordic credit institutions.

At least 50% of debt instruments must have a quality corresponding to a credit rating of Baa3/BBB- or higher.

The total modified duration of the fund, including cash, is from 0 to the benchmark duration plus 2 years.

The modified duration indicates a.o. the price risk of the bonds the fund invests in. The lower the duration, the more price stable the bonds if interest rates change.

At least 90% of the fund's investments must be denominated in or hedged to EUR.

In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment characteristics.

The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes. The fund may take short positions through derivatives. The fund may use credit default swaps with or without underlying assets.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Benchmark

Bloomberg-Barclays Global Corporate Scandi All Grades Index, 5% issuer capped (hedged into the respective class currency).

Risk and reward profile

The fund is categorized as 2. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals

lower risk. Please note that the fund's categorization is not constant and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are interest rate risk, credit risk and market risk. Changes in interest rates will affect the fixed income investments.

For further details about risk, please refer to the following section in the fund's prospectus: "Risk Descriptions".
