Objectives

The objective of this fund is to achieve above-market performance, while applying a defensive asset allocation strategy. Dividends are normally distributed to investors each year.

Investment policy

The fund gains exposure, directly or through other funds, to bonds of companies that meet certain sustainable investment criteria. The fund invests only in underlying funds that apply sustainable investment criteria at either the securities selection or index construction level.

In addition to the sustainable investment policy that applies to all funds in the SICAV, this fund does not invest in bonds issued by companies whose revenues mainly originate from sectors such as tobacco or pornography. The fund may gain exposure to any credit

quality, sector and country.

In actively managing the fund's portfolio, the management team applies a flexible asset allocation that seeks to take full advantage of market changes and opportunities. Asset allocation is also used for risk diversification.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

The fund is categorized as 2. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals

lower risk. Please note that the fund's categorization is not constant and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are interest rate risk, credit risk, market risk and exchange rate risk. Changes in interest rates will affect the fixed income investments.
