Danske Invest SICAV

Europe Long-Short Dynamic Class RA p (LU1542187692)

This fund is managed by Danske Invest Management Company (Société Anonyme), part of the Danske Bank group.

Objectives and investment policy

Objectives
The objective of this fund is to generate a positive return regardless of market conditions. The fund is accumulating.

Investment policy
The fund invests mainly in equities and equity related securities in companies domiciled in or with main activity in Europe. The fund can invest a small part in securities domiciled in or traded on regulated markets in countries outside Europe.

The risk management of the fund is an important part of the portfolio management. Ideally, the risk management contributes to both minimizing the risk and improving the possibilities for a higher return. The risk is reduced by minimizing the sensitivity against movements in the equity market and by diversifying the investments on approx. 25-35 different strategies which typically consist of one long position and several short positions which will only be taken via financial derivative instruments.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Benchmark
The fund has no benchmark.

Risk and reward profile

Lower risk						Higher risk
Typically lower return						Typically higher return
1	2	3	**4**	5	6	7

The fund is categorized as 4. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals lower risk. Please note that the fund's categorization is not constant and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are equity risk, leverage risk, derivative risk and exchange rate risk. As the fund will invest its assets in the equity markets, the value of the fund may fluctuate according to market conditions.

For further details about risk, please refer to the following section in the fund's prospectus: "Risk Descriptions".
