

This document provides you with key investor information about this alternative investment fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this alternative investment fund. You are advised to read it so you can make an informed decision about whether to invest.

Danske Invest SICAV - SIF

Alternatives - Offensive, Class W d (LU1611440378)

The alternative investment fund is managed by Danske Invest Management A/S, a subsidiary of Danske Bank A/S.

Objectives and investment policy

Objectives

The objective of this alternative investment fund is to generate long term returns by investing in alternative investment assets.

Investment policy

The fund invests in a diversified portfolio of different types of investment assets e.g. in private equity, infrastructure, forestry, agriculture and real estate. Financial leverage is typically applied within the individual investments. The fund mainly invests in private companies and funds within the OECD countries. The investment strategy is active. This means that there may be significant differences in the return relative to the fund's target. The returns of the portfolio investments are expected to derive mainly from capital gains and to a lesser extent from dividends and interest. Subscription is only possible

for investors with a portfolio management agreement with Danske Bank or other distributor as described in the prospectus.

Fund shares can normally be redeemed on redemption days. However, limits on redemption may be in effect. Please refer to the following section in the fund's prospectus: "Redemption of Shares".

Recommendation: This fund is restricted to well-informed investors. This alternative investment fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Benchmark

The fund has no benchmark.

Risk and reward profile

The alternative investment fund is categorized as 6. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the alternative investment fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals lower risk. Please note that the alternative investment fund's categorization is not constant and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The fund's risk class categorization indicates that the value of

investments can both rise and fall, a.o. due to political and regulatory changes. Furthermore, operational risks, liquidity risks and macro-economic and financial conditions, may affect the value. Investments in alternative investment assets have additional risk elements compared to other investments such as listed securities. An investment in the fund should be seen as a long-term investment. The success of the fund depends on the ability of the investment manager to identify and select investments that are believed to offer the potential for good returns. The structure of the fund means that it cannot be expected to be fully invested in alternative investment assets, especially in the first five years after the launch. Unlike financial instruments listed on a regulated market, for which the valuation can be based on observable prices, investments in unlisted financial instruments are based on fair values and not market prices. Private investments do not usually display the liquidity or transparency as would be the case with listed securities, and it is usually not possible for the investment manager to sell the investments in the short term as investments are illiquid. Although net issues and/or net redemptions of fund shares are restricted, they may affect the investment level and the risk and reward profile of the fund. The fund operates with an anti-dilution mechanism in order to counteract this.

For further details about risk, please refer to the following section in the fund's prospectus: "Risks".

Charges

The charges you pay are used to cover the costs of running the alternative investment fund, including marketing costs and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge 1)	10.00%
Exit charge 2)	10.00%
1) This is the maximum that might be taken out of your money before it is invested. 2) This is the maximum that might be taken out of your money before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.70%
Charges taken from the fund under certain specific conditions	
Performance fee	0% (the fund is not charged a performance fee, but it is estimated that a performance fee in the fund's underlying investments will amount to 0.3%).

The ongoing charges are based on the previous year's expenses. The figure may vary from year to year.

The entry and exit charges shown are maximum figures. The charges cover the alternative investment fund's expenses in connection with increase/decrease in shareholders. In some cases

you may pay less. For further details please consult your financial adviser or distributor.

For more information about charges, please refer to the following section in the alternative investment fund's prospectus: "Fees charged to the Sub-Fund".

Past performance

Launch date

30 June, 2017.

Calculation method

Below is shown the alternative investment fund's and any benchmark's annual returns in percent including dividends if any. Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation. Past

performance has been calculated in: EUR.

Disclaimer

Past performance is not a reliable indicator of future results.

Since the fund has existed less than a calendar year there are insufficient data to provide useful information regarding past performance.

Further information

Further information about Danske Invest is available online at www.danskeinvest.com.

More detailed information about this fund is available in the fund's prospectus or in the latest semi-annual and annual reports which are available free of charge at www.danskeinvest.com.

The alternative investment fund is a separate part of the umbrella fund Danske Invest SICAV - SIF. Your investments will not be affected by the development in other funds under Danske Invest SICAV - SIF. The funds' assets and liabilities are segregated by law. The funds are liable only for their own debt and any joint expenses.

Information regarding the remuneration policy of the management company is available on www.danskeinvest.com. The remuneration policy describes how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, and the composition of the remuneration committee, where such a committee exists. A paper copy is available free of charge upon request.

Price publication

The Net Asset Value for the alternative investment fund is calculated on the last business day of each month and on the 15th calendar day of each month, or if such day is not a business day, the following business day, which is not a holiday in Luxembourg. The latest prices are available online at www.danskeinvest.com.

Tax legislation

The fund is subject to the tax laws and regulations of Luxembourg. Depending on your own country of residence, this may have an impact on your investment or your personal tax position. For further details please consult a tax adviser.

Disclaimer

Danske Invest Management A/S may be held liable solely on the basis of any statement contained in this document if it is misleading, inaccurate or inconsistent with the relevant parts of the fund prospectus.

General trading terms

Fund shares are traded through Danske Bank A/S.

Trading conditions - including information regarding requests for redemption exceeding the entire shareholding - are available in the following sections of the prospectus: "Issue of Shares, Redemption of Shares and Conversion of Shares".

Note regarding redemption: If redemption limits are met, investors may not be able to redeem part of or all of their shares and receive the relevant redemption proceeds within the time frame indicated in the prospectus.

Furthermore, shares may only be redeemed on a monthly basis and subject to a prior notice period of 3 months. Investors should understand and accept that by investing they will not enjoy the same liquidity common to investments in undertakings for collective investments in transferable securities. Investors should therefore be able to withstand periods of illiquidity.
