

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Danske Invest SICAV

Multi Asset Inflation Strategy Class A-sek h (LU1916064931)

This fund is managed by Danske Invest Management Company, part of the Danske Bank group.

Objectives and investment policy

Objectives

The objective of this fund is to achieve a return in excess of inflation (real return) in EUR over a 3 to 5-year period. The share class is accumulating.

Investment policy

The fund gains most of its exposure to investment grade bonds from anywhere in the world, including emerging markets, by investing directly in securities or indirectly, through derivatives and other funds. The fund may also invest in equities.

The fund invests at least 50% of net assets in bonds (including government inflation-linked bonds and covered bonds) and other debt instruments, and in money market instruments.

In actively managing the fund's portfolio, the management team applies a flexible and dynamic asset allocation (including both strategic and tactical asset allocation) that seeks to take full advantage of market changes and opportunities, and to protect the fund against inflation. Asset allocation and derivatives are also used for risk diversification and mitigation of downside risk.

The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes. The fund may take short positions through derivatives. The fund may use credit default swaps with or without underlying assets and total return swaps, including contracts for difference.

Usually the expected level of leverage is 100% to 300% with a maximum expected leverage of 550%. Leverage may increase the effects of adverse market movements or decrease the effects of favourable market movements.

The main part of the share class' NAV will be hedged against the base currency of the fund. However, the share class remains exposed to the currencies of the investments in the fund.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Benchmark

The fund has no benchmark.

Risk and reward profile

The fund is categorized as 4. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals lower risk. Please note that the fund's categorization is not constant

and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are equity risk, interest rate risk, credit risk, leverage risk, derivative risk and exchange rate risk. As the fund will invest its assets in both the fixed income and equity markets, the changes in the market conditions and interest rates will affect the return of the fund.

For further details about risk, please refer to the following section in the fund's prospectus: "Risk Descriptions".

Charges

The charges you pay are used to cover the costs of running the fund, including marketing costs and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge 1)	3.00%
Exit charge 2)	1.00%
1) This is the maximum that might be taken out of your money before it is invested. 2) This is the maximum that might be taken out of your money before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	1.17%
Charges taken from the fund under certain specific conditions	
Performance fee	0% (the fund is not charged a performance fee).

The ongoing charges are based on the previous year's expenses. The figure may vary from year to year.

The ongoing charges excludes performance related fees and transaction costs including brokerage fees and bank charges on securities transactions.

The entry and exit charges shown are maximum figures. In some

cases you may pay less. For further details please consult your financial adviser or distributor.

In addition, a conversion fee may be charged in relation to conversions as described in the prospectus.

For more information about charges, please refer to the following section in the fund's prospectus: "Fund Fees and Costs".

Past performance

Launch date

15 March, 2019.

Calculation method

Below is shown the fund's and any benchmark's annual returns in percent including dividends if any. Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation. Past performance has been calculated in: SEK.

Disclaimer

Past performance is not a reliable indicator of future results.

Since the fund has existed less than a calendar year there are insufficient data to provide useful information regarding past performance.
